

Project goals

Preventing climate change and protecting the environment

Development of key competences

Development of ecological skills

WE SAY THAT STOP WASTING

PROJECT NO: 2021-2-SI01-KA210-SCH-000049161
DURATION TIME: MAY 2022- JULY 2023

Funded by
the European Union

Slovenia

Poland

Türkiye

Project partners

Polish mobility

15th January- 21st January

Main topic: FOOD WASTING

RECYCLING WORKSHOP WITH AN EXPERT

WORKSHOP: WASTE LESS, SAVE MORE, LIVE MORE

LEAFLETS ON RECYCLING

How to produce less trash

1. Throw recyclable trash into the right trash bins
2. Buy products that are easy to recycle - some materials are easier to recycle than other
3. Try to use trash in new ways, you could for example turn a jar into a lamp.
4. Don't throw out leftovers, put them in the fridge and eat them later

Put waste in the right place!

WHY RECYCLING IS IMPORTANT?

- WHEN YOU RECYCLE TRASH YOU CAN SAVE THE EARTH
- YOU CAN CLEAN THE ENVIRONMENT TOO

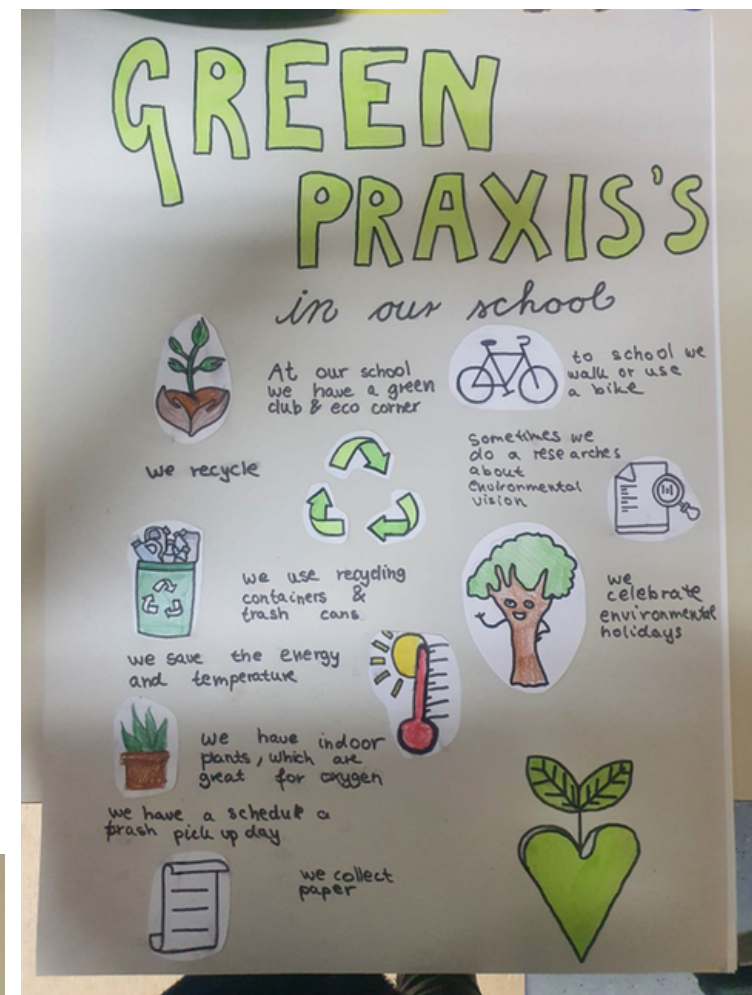

IT'S NOT REALLY HARD!

ALL YOU HAVE TO DO IS THROWING TRASH INTO THE RIGHT BIN.

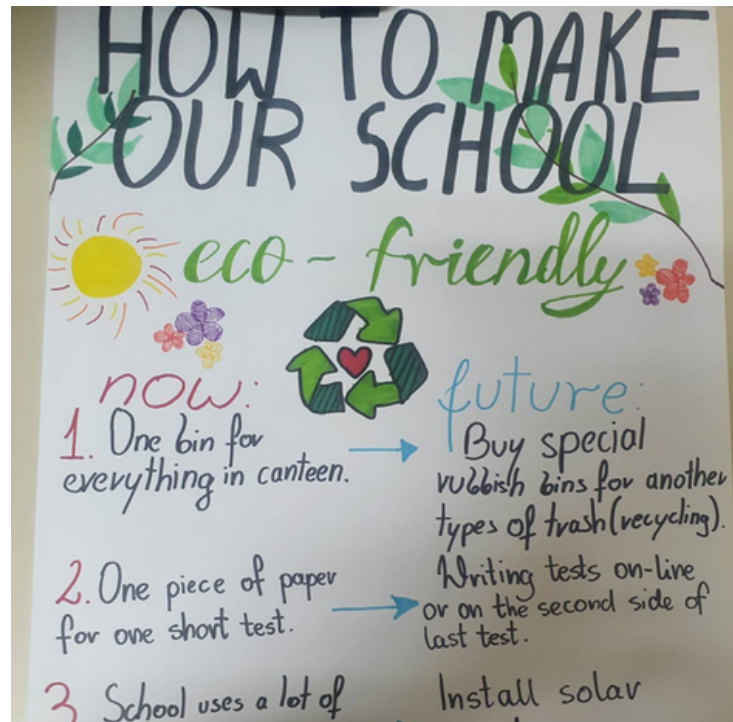

WHAT RECYCLING REALLY IS?

RECYCLING IS MAKING SOMETHING FROM TRASHES OR THINGS THAT WE DON'T USE - IT'S LIKE GIVING THEM NEXT LIFE.

CALENDARS MAKING

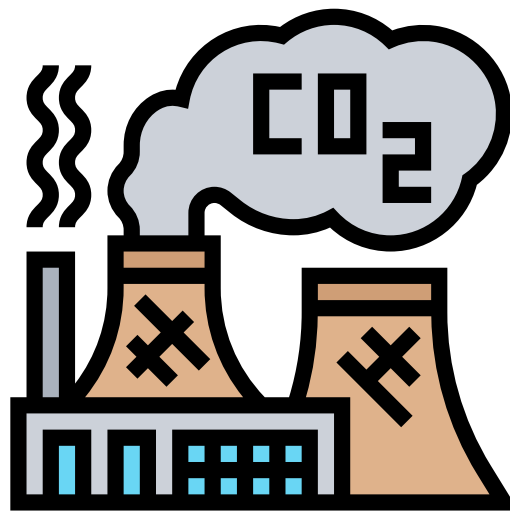

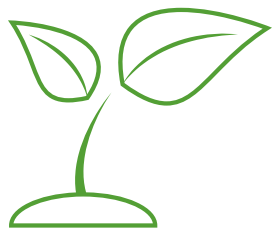

GREEN PRACTICES IN OUR SCHOOLS

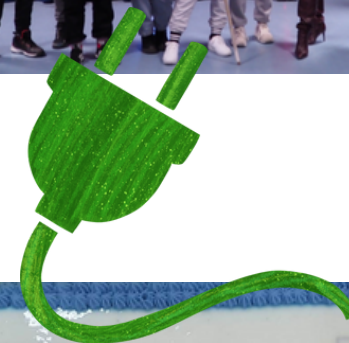

WORKSHOP IN CRACOW ABOUT ENVIRONMENTAL PROBLEMS

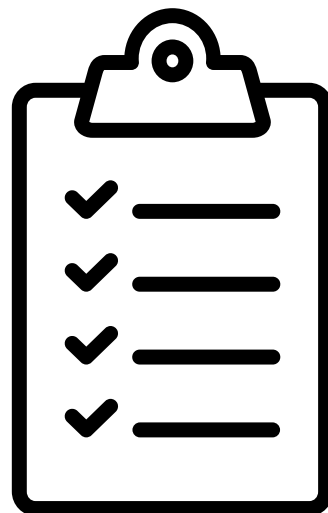

**'WE ARE THE WORLD,
WE ARE THE CHILDREN'
CONCERT WITH
A CERTIFICATE
CEREMONY**

*Shop As Much As
You Need
a COOKING WORKSHOP*

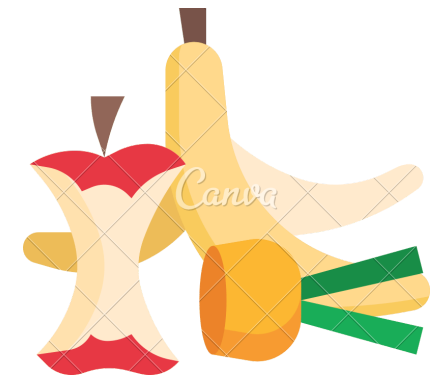

Project: *We Say That Stop Wasting!*

**RECYCLING
SOUVENIRS**

Zero Waste philosophy:

Zero Waste is a philosophy and design framework that promotes not only reuse, recycling, and conservation programs, but also, and more importantly, emphasizes sustainability by considering the entire life-cycle of products, processes, and systems.

6

GREEN LIFE

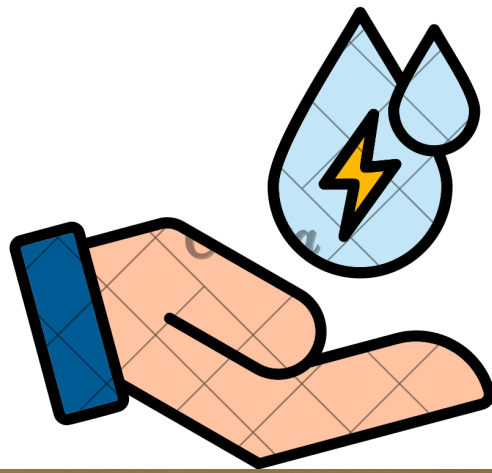

E-BOOKS

Ways to prevent food wasting?

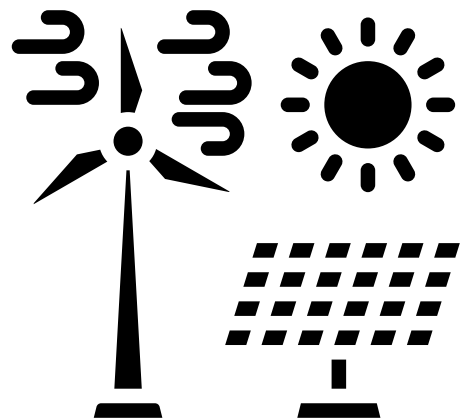

- 1 Create a meal plan
- 2 Save and eat leftovers safely
- 3 Compost
- 4 Store food appropriately
- 5 Don't throw away food you can eat

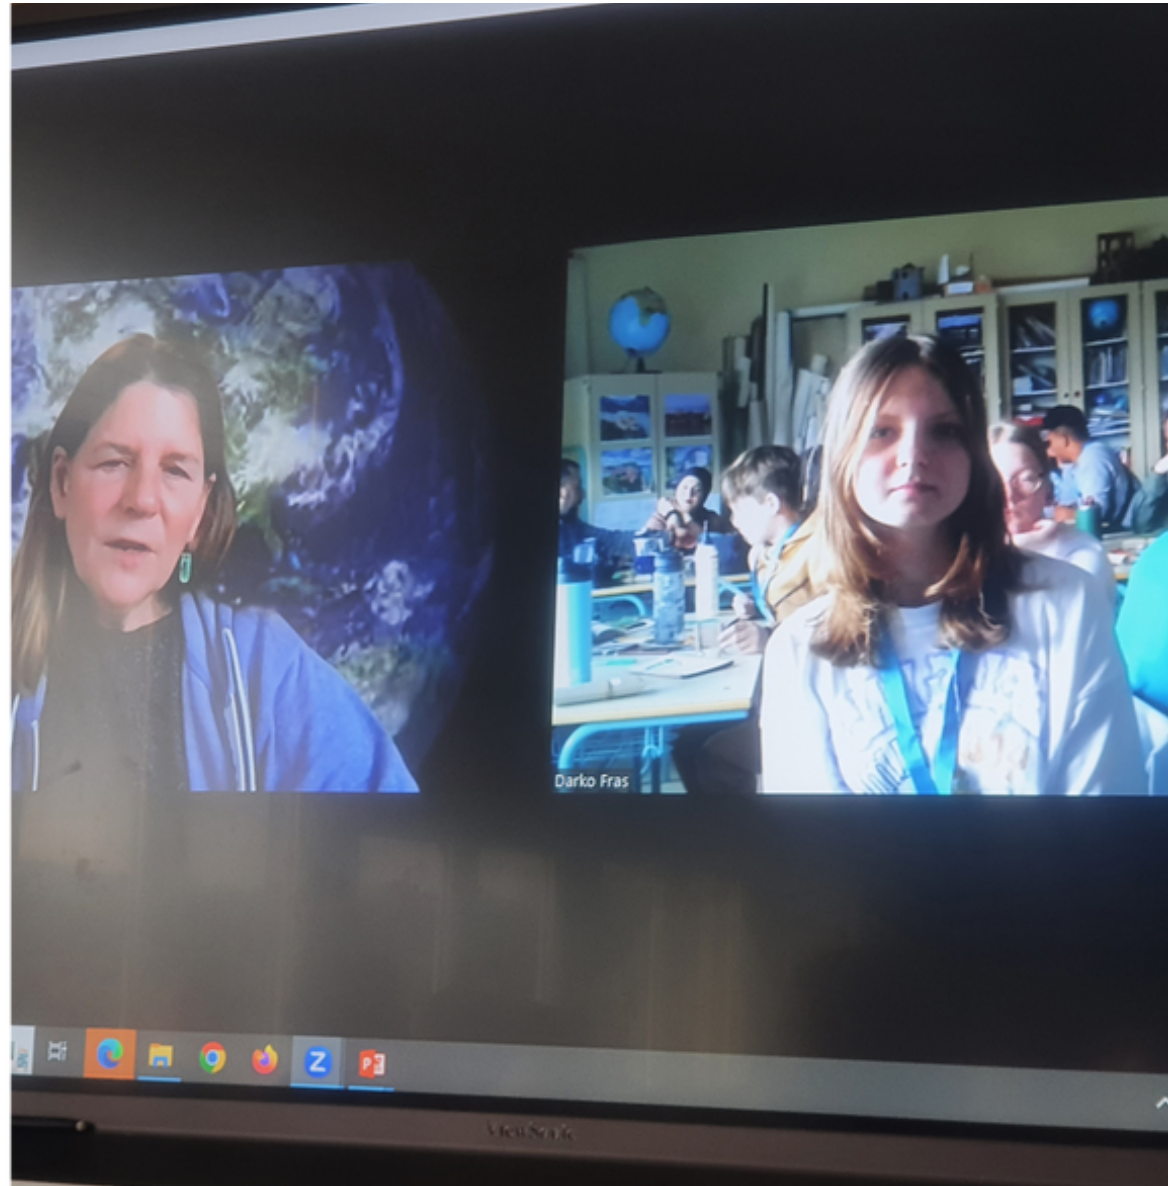

7

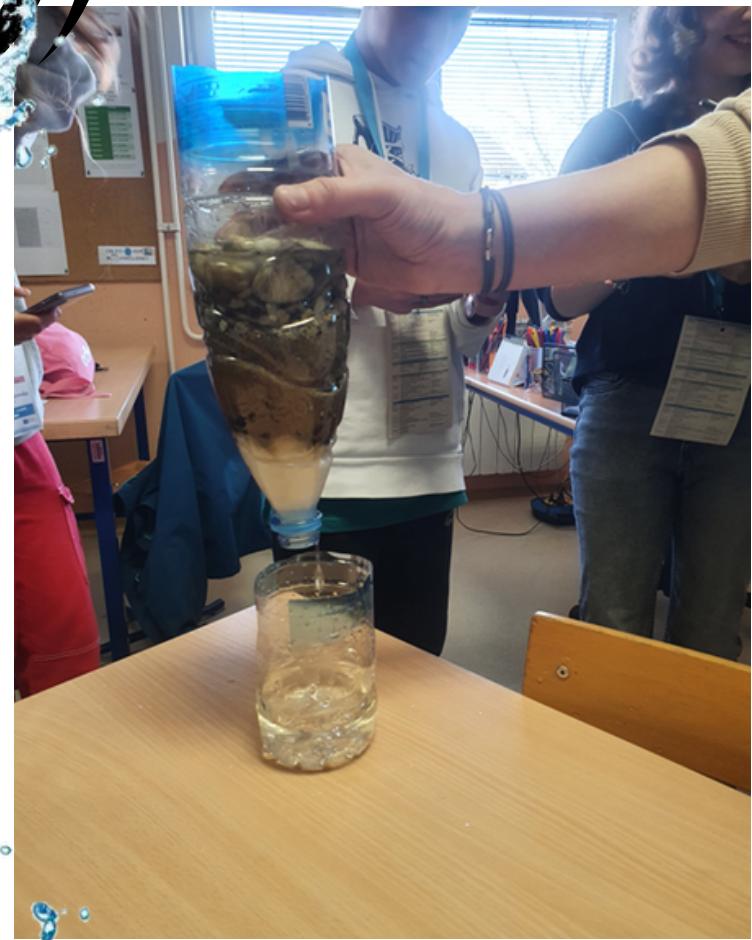

Slovenian mobility
26th March- 1st APRIL
Main topic: WATER AND
ENERGY WASTE

DEBATE IN THE FORM OF AN INFORMATION PANEL with an expert from the USA, Dr. Dorian W. Janney - scientist from NASA, entitled The Importance of Water and Energy

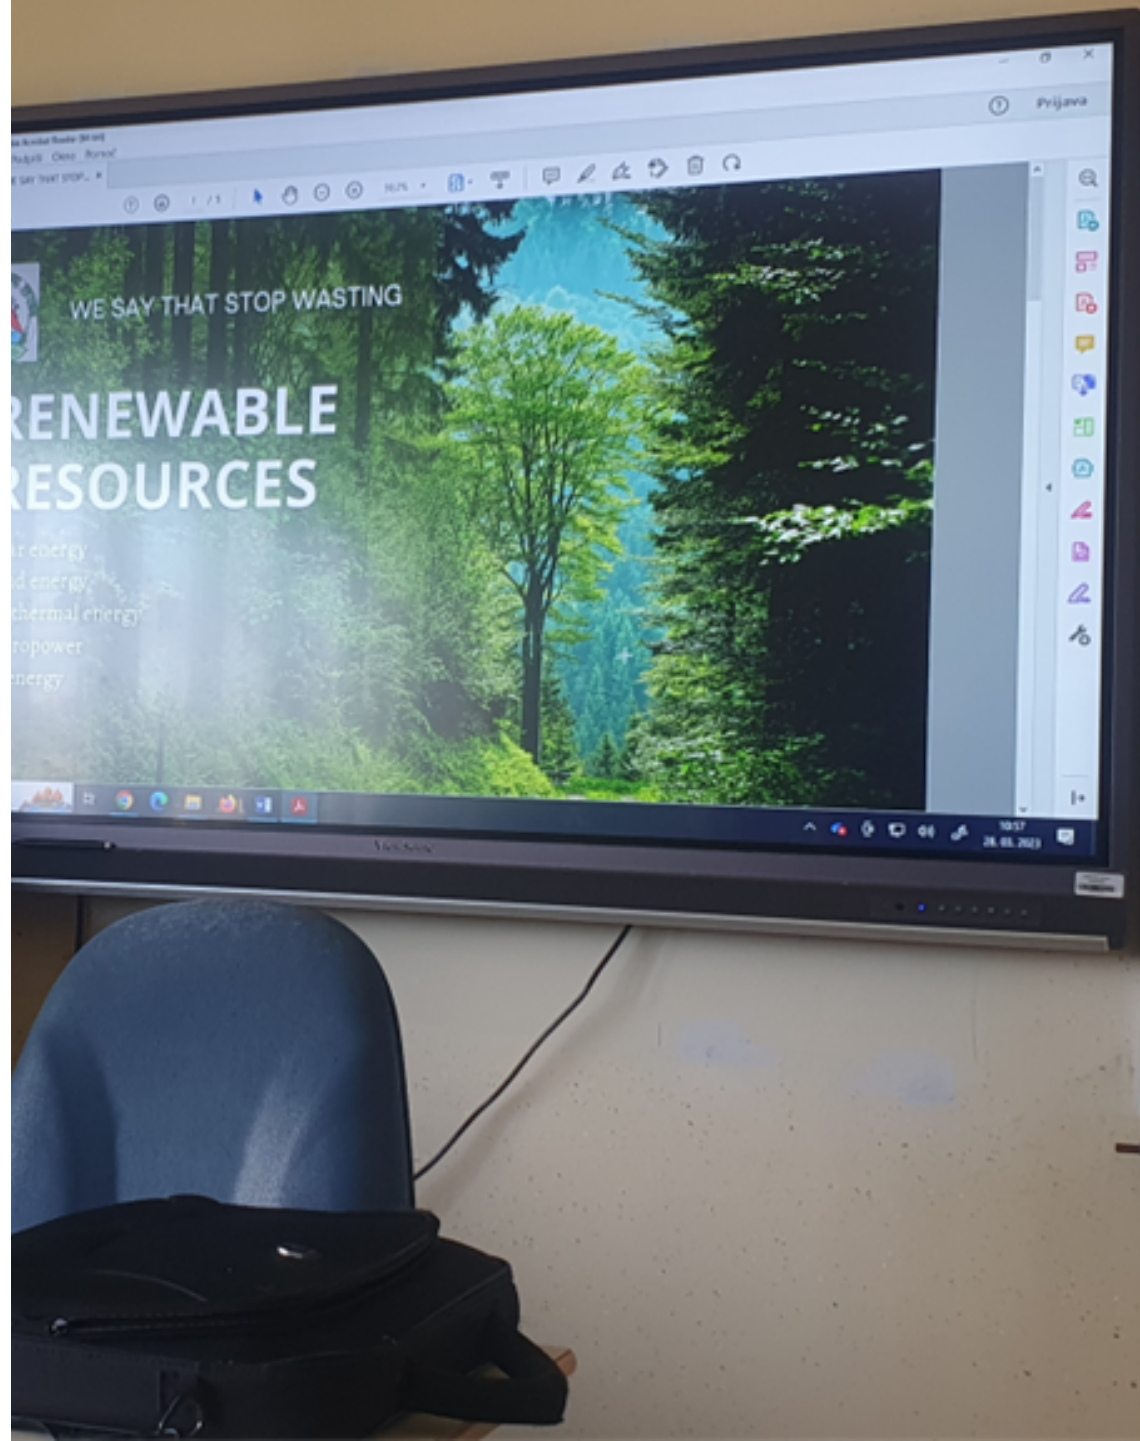

**Experimenting with water,
tasting local mineral waters,
comparing flavors with
special attention on the
minerals contained.**

**Classes with an expert from
the local energy agency from
Pomurje, Mr. Štefan Žohar**

Visit to an organic tomato greenhouse heated by geothermal energy

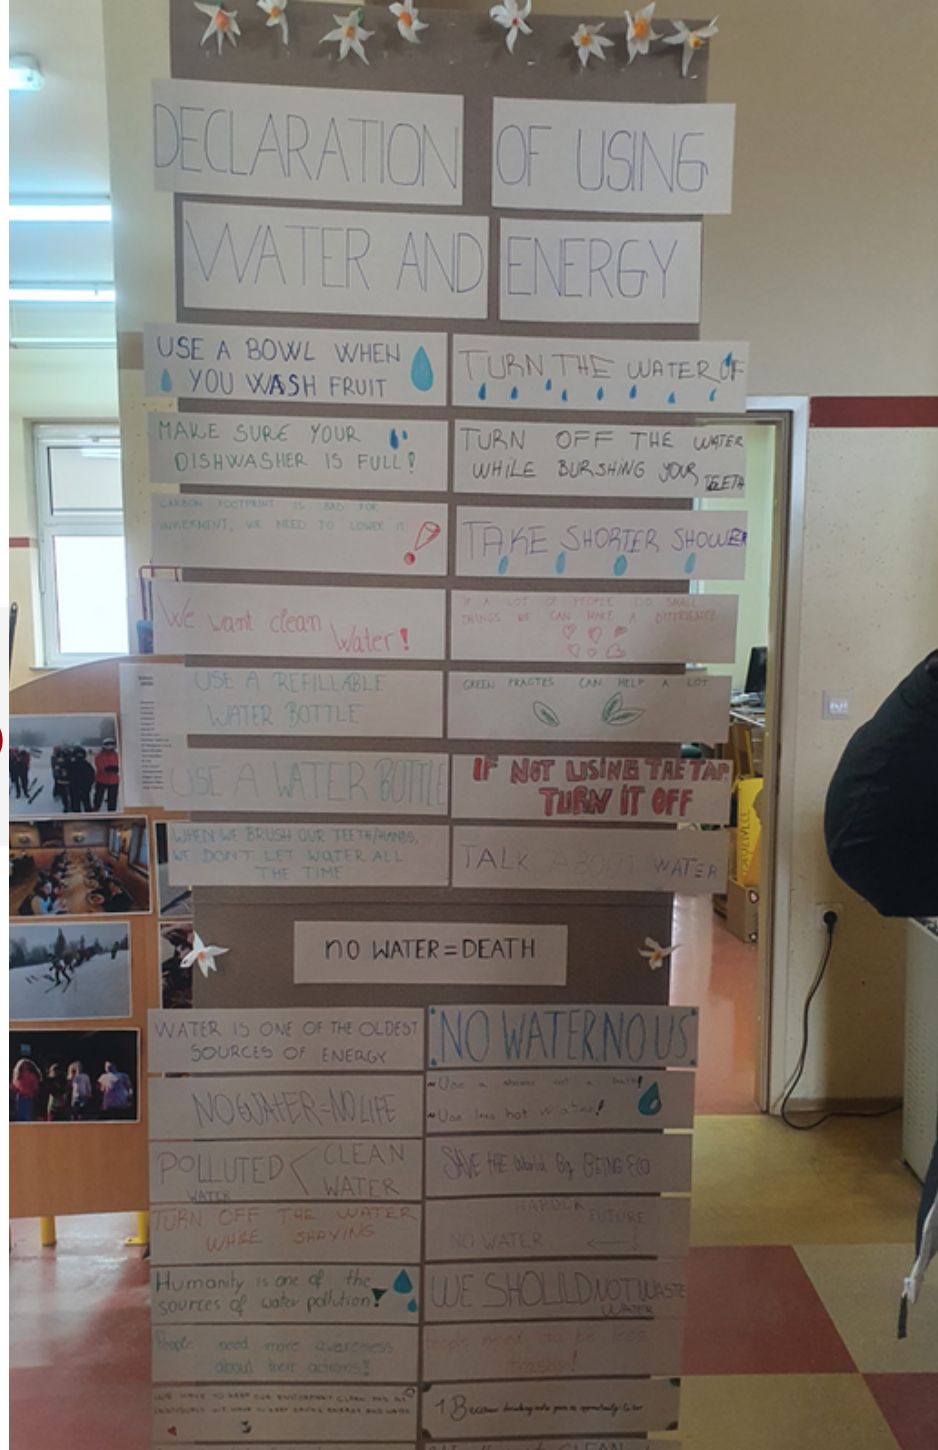

**SHOW
TIME**

Script making, creating eco-costumes and decorations for a performance for the school community and the local municipality of Cancova

Developing eco-friendly ideas in groups for the topics developed by each team, e.g.: on solar, wind, water, etc.

Participation in an outdoor game using the CŠOD Misija application; students could demonstrate their knowledge of ecology in accordance with the assumptions of our project.

CŠOD Misija

Doživljajsko učenje na prostem

A performance summarizing the whole week of mobility for the school community and the local municipality of Cancovain the nearby community center of all project participants

Turkish mobility

28 May- 3rd June

Main topic: RECYCLING
AND ENVIRONMENTAL
PROBLEMS

**painting on water with
EBRU ART
using recycled
materials**

soap making workshops using recycled materials

**a lecture by a specialist
on waste management
in Turkey at
the Science Centre**

**lecture on how recyclable
materials are recovered -
a visit
to a nearby landfill**

Erasmus slogan
Every New Tree Brings
A New Step To A Brighter Future

ERASMUS+

"EVERY NEW TREE BRINGS A NEW STEP TO A BRIGHTER FUTURE"

KEEP THE WORLD CLEAN AND SAVE THE PLANET

WE SAY THAT STOP WASTING

be ECO!

BEING ECO IS VERY COOL CUZ WHEN YOU ARE ECO THE WORLD IS CLEAN AND MORE BEAUTIFUL.

SAY STOP TO POLLUTING OUR PLANET!

We all know that our planet is dying because of climate changes. But when we will be more eco together, it will change.

THINK GREEN, **KEEP IT CLEAN**

A RENEWABLE ENERGY SOURCE MEANS ENERGY THAT CAN'T RUN OUT, OR IS ENDLESS.

TYPES OF RENEWABLE SOURCES OF ENERGY:
WIND ENERGY
SOLAR ENERGY
HYDROPOWER
GEOTHERMAL
BIOMASS

RECYCLING IS IMPORTANT- IT ALLOWS US TO REUSE MOST OF WASTE

IF YOU RECYCLE ONE GLASS BOTTLE, IT SAVES ENOUGH ENERGY TO LIGHT A BULB FOR FOUR HOURS

posters
on
pollution

We say that stop wasting

THE SOLUTION IS **LESS POLLUTION**
